- 145 Wetland thicket shrubs
- 193 Traditional garden shrubs
- 18,784 Perennials
- 5,550 Ferns

*It started when the Allegheny River Community of Aspinwall bought a private marina and turned it over to the public to create a public park. The original purchase and the funding for the park have all been raised through grassroots campaigns. The goal has been to create a community park connected to the river and to the existing riverfront trail systems, and to protect and expand the unique ecosystem on site. Eisler Landscapes has supported this vision and worked with the community and designers to build a unique park.*
